# BENITO -Covers and Grates

### Dry barrel hydrant

## **DN100**

HIDCSF

The hydrant is a device that supplies a large amount of water in a short amount of time.

It allows the connection of hoses and firefighting equipment, as well as the filling of firefighters' water tanks.

#### Nominal pressure of 16 bars.

Leakage test of 25 bars.

**Interior components** highly resistant to corrosion and aging (brass and stainless steel).

#### **Tilted outlets**

Outlets: Barcelona pressed aluminium fittings

1 x 100 2 x 70

1 x 70 2 x 45

Horizontal or vertical DN-100 connection

#### 360° adjustable head

**Anti-freeze system:** the fire hydrant automatically drains after use, protecting it from frost damage.

Anti-breakage system: it incorporates an anti-breakage system that ensures sealing in case of impact breakage.

**Cover:** top part made of cast iorn, plus two aluminium or polyester lids.
